SUMMARY

Video editor with 10+ years in video production and a Marketing degree from FGV (Brazil). I turn raw creator footage into short-form videos built for retention and cut them into multiple lengths, hooks and versions for paid ad testing on Meta and TikTok. I work closely with media buyers and creative strategists, iterating on edits based on ad performance. AI-assisted workflow for fast turnaround without losing quality. My short-form content has reached **25M+ views** with partners like CazéTV and TNT Sports.
